

Molcas 8.2 for PRIMERGY

Webpage

<http://www.molcas.org/>

Version

8.2

Tools for Compiling

- Intel Compiler 17.0.4.196
- Intel MPI 2017.4.196
- Intel MKL 2017.4.196

Necessary Files for Compiling

- molcas82.tar.gz
- license.dat

Attention

- Compile option "-xSSE4.2" is set because verification would be failed with "-xAVX".
- Unless ./configure is executed twice, the built-in blas routine is used.
- For compatibility with Intel MPI, we modified some integer variables to 8 byte integer type.

Procedure of Compiling

```

#!/bin/csh -f
umask 022
set file_molcas=/home/users/${USER}/build/molcas82/molcas82.tar.gz
set file_license=/home/users/${USER}/build/molcas82/license.dat

set prefix=/local/apl/pg/molcas82
