

LAMMPS 16Mar18 (stable release) for LX with GPU support (gcc)

Webpage

<http://lammps.sandia.gov/>

Version

16Mar18

Build Environment

- GCC 5.3.1
- Intel MKL 2018 Update 2
- Intel MPI 2017.3.196
- libjpeg-turbo 1.2.90
- CUDA 8.0.61

Files Required

- lammps-stable.tar.gz (16Mar18)
- (some files are obtained in the following script)

Build Procedure

(2018/7/4: update)

```
#!/bin/sh

VERSION=16Mar18
INSTALL_PREFIX=/local/apl/lx/lammps${VERSION}-gnu-CUDA8

BASEDIR=/home/users/${USER}/Software/LAMMPS/${VERSION}

List of Packages

ASPERHE, BODY, CLASS2, COLLOID, COMPRESS, CORESHELL, DIPOLE, GPU, GRANULAR
 KSPACE, LATTE, MANYBODY, MC, MEAM, MISC, MOLECULE, MPIIO, OPT, PERI, POEMS
 PYTHON, QE, REAX, REPLICA, RIGID, SHOCK, SNAP, SRD, VORONOI

USER-ATC, USER-AWPMD, USER-CGSDK, USER-COLVARS,
 USER-DIFFRACTION, USER-DPD, USER-DRUDE, USER-EFF, USER-FEP,
 USER-H5MD, USER-INTEL, USER-LB, USER-MANIFOLD, USER-MEAMC,
 USER-MESO, USER-MGPT, USER-MISC, USER-MOLFILE, USER-NETCDF,
 USER-OMP, USER-PHONON, USER-QTB, USER-REAXC, USER-SMTBQ,
 USER-SPH, USER-TALLY, USER-UEF

Tests

- The results of the tests were equivalent to the no-GPU version tests, so skipped here. Please check [this page](#) for detail.
- GPU test was performed with in.rhodo sample in bench/ directory. (The same one can be found in samples/.)

Notices

- Files installed in /local/apl/lx/lammps16Mar18-gnu-CUDA8/. (can also be accessed from /local/apl/lx/lammps16Mar18-gnu-CUDA)
- Exe file (lmp_rccs) and LAMMPS library can be found in src/. (There is also a symbolic link to that dir: bin/.)
- Sample job scripts are available in samples/ directory.
- Python module files are copied to python/ directory.
- LAMMPS header files in src/ directory are also copied in src/ directory.
- vmd molfile plugin files are available in /local/apl/lx/vmd193/lib/plugins/LINUXAMD64/molfile directory.

Changelog

- (2018/7/4) LAMMPS and LATTE licenses are (GPL v2 **OR LATER**), so there is no problem.
- (2018/7/3) ~~LATTE was removed from the installation due to the license conflict between METIS (Apache License 2.0; used in LATTE) and LAMMPS (GPL v2). While LATTE might be installed without METIS, we are not planning to build that version of LAMMPS for now.~~
