## Notes

- All the tests have been passed.
- Intel 2020u2 failed to compile yambo (fftw part). This is a known issue of this compiler version.
  - <https://community.intel.com/t5/Intel-C-Compiler/icc-and-fftw-and-INT-MAX/m-p/1219856?profile.language=en>
- Intel 2019u5 and 2019u5(compilers and MKL) + 2020u2(MPI) couldn't pass tests.
- Intel 18 version shows slightly better performance than GCC version (tested with Au surf system).
- plumed option seems to be removed from Makefile (obsolete?).
- gipaw is not available for this version (at least for now; Jan 4, 2021).
