

Molpro 2021.3.1

Webpage

<https://www.molpro.net/>

Version

2021.3.1 (latest commit: 2021/11/23 17:31:27 +0100)

Build Environment

- GCC 9.3.1 (devtoolset-9)
- Intel Parallel Studio 2018 update4 (mkl and mpi)
- Global Arrays Toolkit 5.8

Files Required

- Molpro_release.tar.gz (downloaded Molpro_release directory was tar-gzipped.)
- ga-5.8.tar.gz
- work.patch
 - to change default work directory setting
- patch-argos-binput.F
- patch-cic-ltfFortranInt.h
- patch-common_modules-common_cconf1
 - change parameters for huge CI calculations
- patch-mpp-ga_impl_select
 - change default scratch file setting for single node runs from "disk" to "ga"
- patch-common_modules-common_cftypes
- patch-util-iom
- patch-util-iow
 - work-around for character type "findloc" Fortran 2008 function
 - (On CentOS 7 + devtoolset-9 environment, shared link of molpro executable failed.)
- secure_snprintf.patch
 - to avoid ga build error
- token

Build Procedure

```
#!/bin/sh

```

Notes

- (patch files are available at /local/apl/lx/molpro2021.3.1/patches)
- one of ga tests failed [as in the previous version](#).
- all the molpro tests have passed successfully.
 - slater is disabled, since its test can't be passed.
- Molpro 2021.2 or later employs "disk option" for scratch files of single node runs. However, local disk is not available in RCCS system; /wor/users is on network (lustre) filesystem. We thus change the default setting to the conventional memory one.
 - default "disk option" can be utilised by adding "--ga-impl disk" option.
- some parameters (such as permissions) were modified after the installation (not mentioned in the procedure above)
- On CentOS 7 + devtoolset-9 env, link of molpro.exe failed due to findloc for character type function (not very sure about this error, though).
 - we avoided this error by manually adding equivalent function to findloc of character type.
 - (instead of adding findloc equivalent, static linking of molpro.exe might be another solution (not tried))
